iOS Enrollment on Mobile Devices to M365 User Guide For New & Existing Users

- **This is my first time to setup Microsoft 365 on a mobile device:**
  1. **Section A:** Download Management Profile and Setup web-based device enrollment, click here
  2. **Section B:** Add the **First** Authentication Method and Setup the Authentication App, click here
  3. **Section C:** Add the **Second** Authentication Method, click here

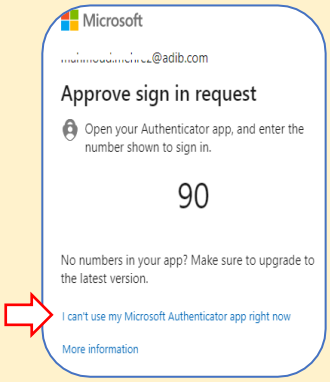

- **I want to setup Microsoft 365 on a new mobile device and remove the old one:**
  1. Remove the old device from your account authentication methods, click here
  2. **Section A:** Download Management Profile and Setup web-based device enrollment, click here
  4. **Section B:** Add the **First** Authentication Method and Setup the Authentication App, click here
  3. **Section C:** Add the **Second** Authentication Method, click here

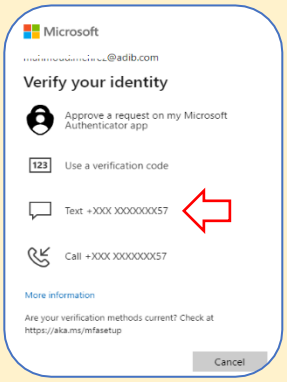

Remove the old device from your account authentication methods

(Please skip this step if you are setting up M365 for the first time)

A. **Open** the following **URL** from your ADIB's Windows device or through VDI https://aka.ms/mysecurityinfo

If the old device with the authentication app is not available, you will need to select **"I can't use my Microsoft Authenticator app right now"** then select the alternative method "**SMS** or **Call**" to sign in

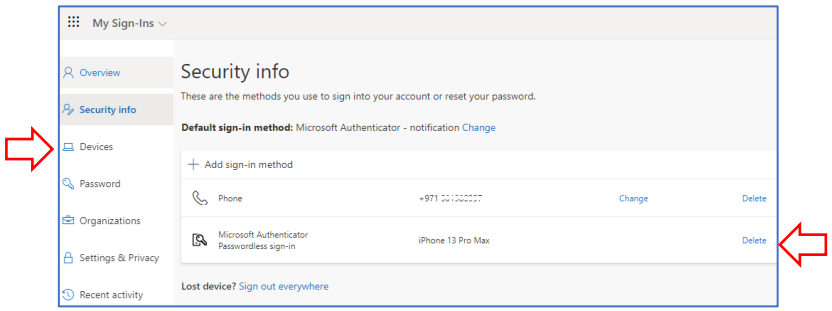

B. **Click** on **Security Info**

C. **Click** on **Delete** next to the device you wish to delete

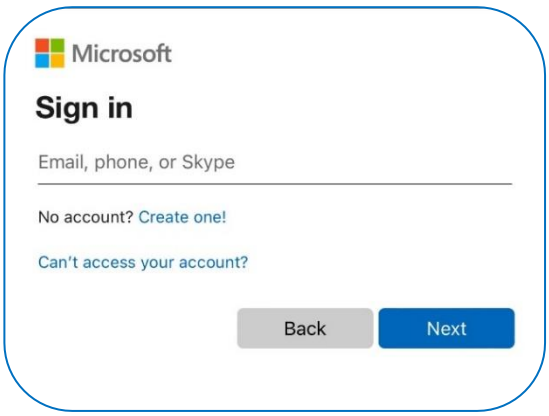

D. **Remove** the **Management Profile** from the old mobile device (if exists)

- **Go to Mobile Settings > General > VPN & Device Management > Management Profile and click** on **Remove Management**

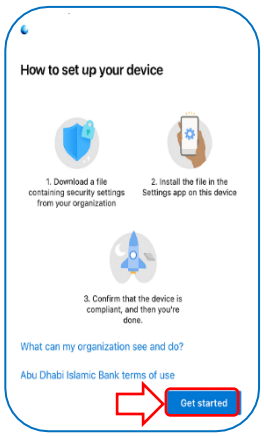

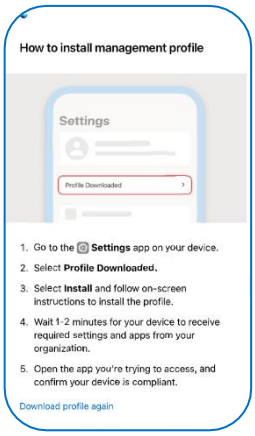

Section A: Download Management profile

1. **Open** the following **URL** from your **Safari** mobile phone browser https://aka.ms/iosenrollment
2. **Sign in** using **ADIB Email Address** and **Windows Password**

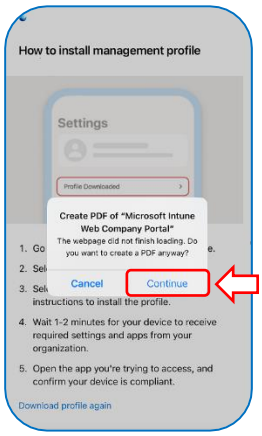

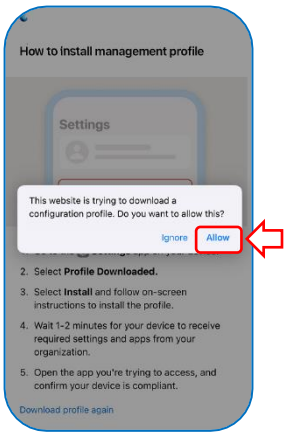

3. **Click** on **Get started**

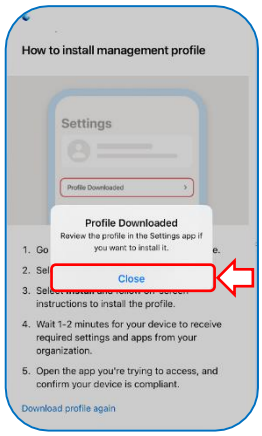

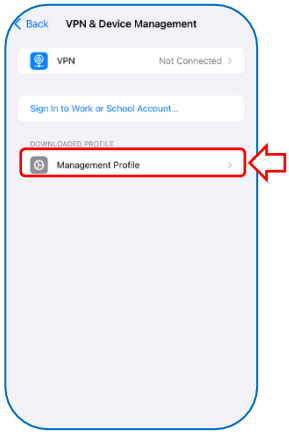

4. **Click** on **Continue**
5. **Click Allow**
6. **Click Close**

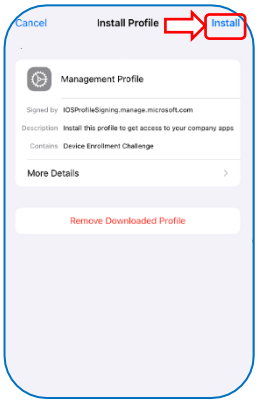

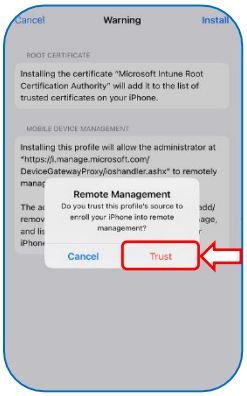

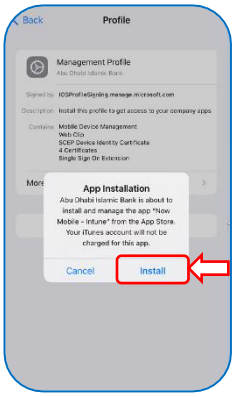

7. **Open Mobile Settings** choose **General** then choose **VPN & Device Management**
8. **Click** on **Management Profile**

9. **Click Install**
10. **Click Trust** and the applications will start installing in 1-2 minutes

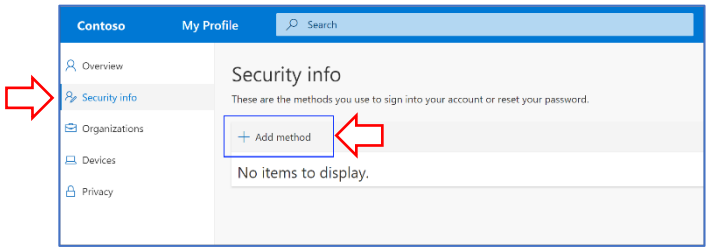

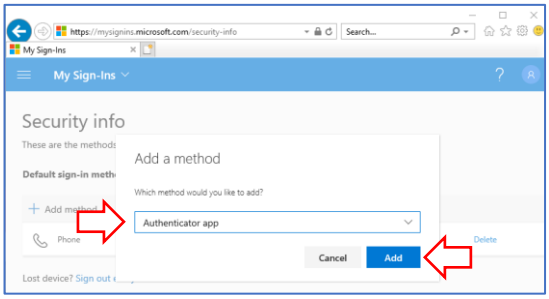

Section B: Add the First Authentication Method and Setup the Authentication App

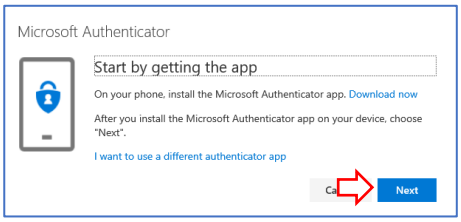

1. **Download Microsoft Authenticator App** from **App Store** (in case you have it, it is recommended to delete it and reinstall)
2. **Open** the following **URL** from your ADIB's Windows device or through VDI https://aka.ms/mysecurityinfo
3. **Sign in** using **ADIB Email Address** and **Windows Password**
4. **Click** on **Security Info** > **Click** on **Add Method**

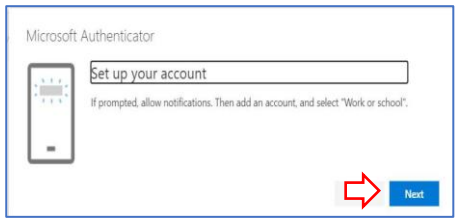

5. **Select Authenticator App** > **Click Add**

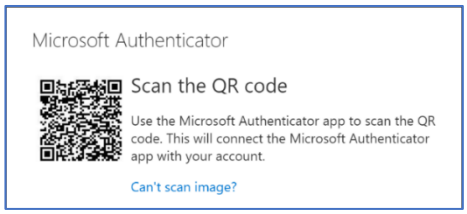

6. **Click Next**

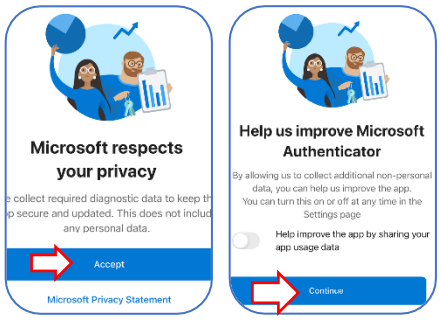

7. **Click Next**

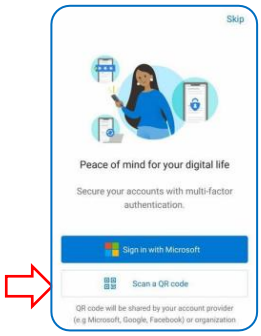

8. When you are on **Scan the QR code page, open** the **Authenticator App** on your **mobile device**

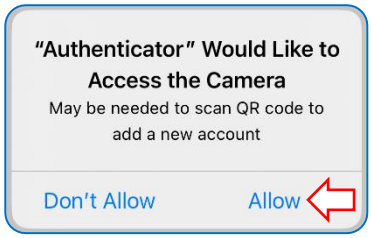

9. On your **mobile device open** the **Authenticator App** and **click Accept** then **Continue**

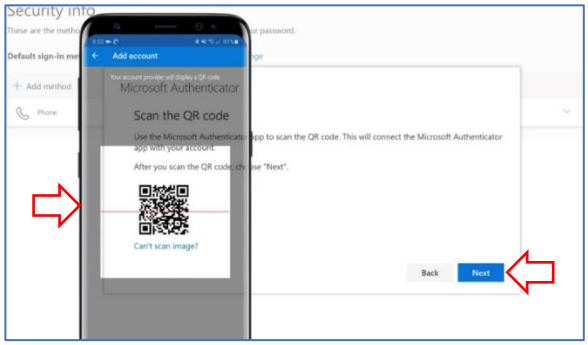

10. **Click Scan a QR code**

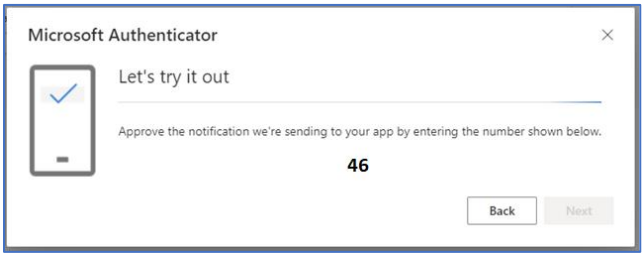

11. **Scan QR code** will require permission **for your camera**, **Click Allow**

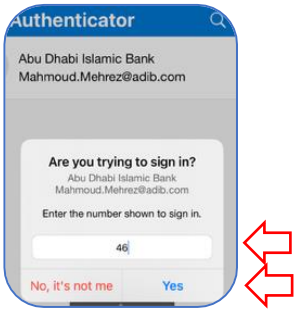

12. **Scan** the **QR code** available in your **computer**: windows 10/VDI device received initially

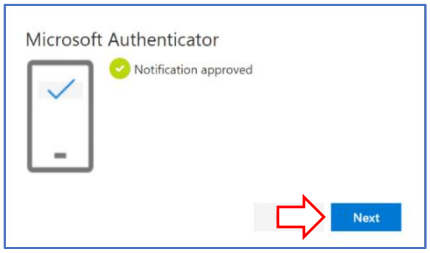

13. **Confirm** the **number** shown in the **computer** by adding the same number to the **Authenticator App** in your **mobile**

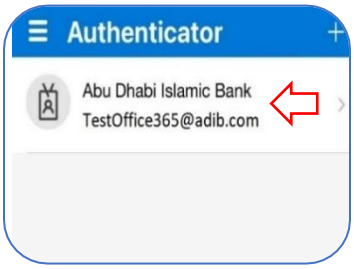

14. After the QR code is accepted by the **Authenticator App**, **click Next** in the **computer**: windows 10/VDI device

15. **Enable the Password-Less feature in the Authentication App**

A. **Open** the **Authenticator App** on your **mobile**

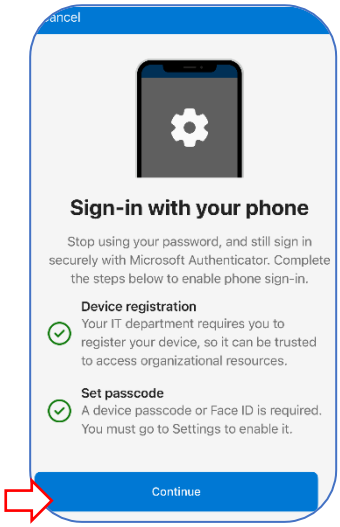

B. **Click** on your **Abu Dhabi Islamic Bank** account

C. **Click** on **Enable phone sign in**

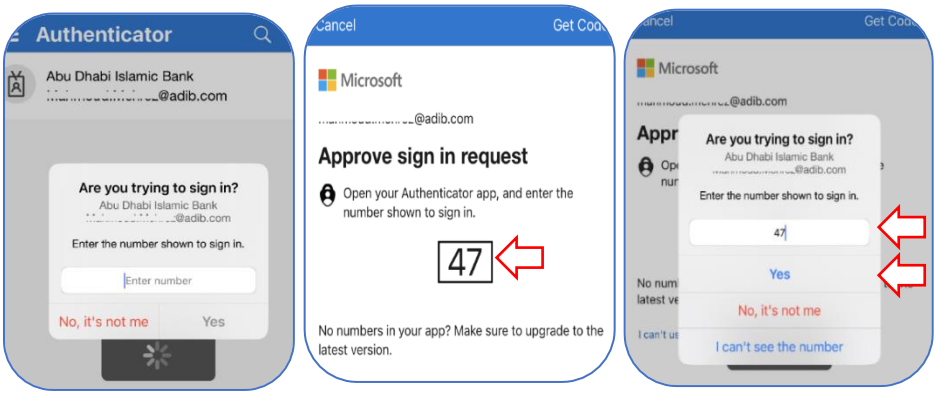

D. On the **Sign-in with your phone** page, **select Continue** and confirm your identity

E. Next you will be required to enter your **Windows Password** and **click Sign in**

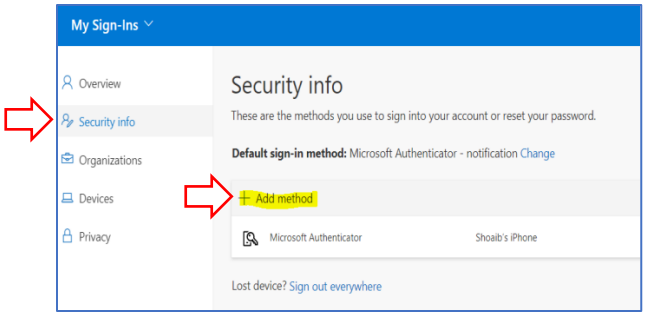

F. Once you have entered the password, **confirm** the same **number** shown in the **Authenticator App** then **click Yes**

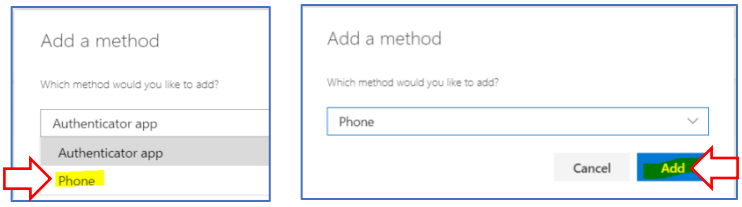

Section C: Add the Second Authentication Method

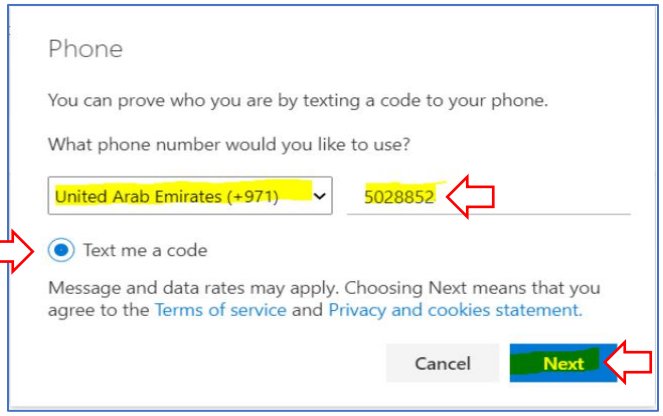

1. **Open** the following **URL** from your ADIB's Windows device or through VDI https://aka.ms/mysecurityinfo
2. **Sign in** using **ADIB Email Address** and **Windows Password**
3. **Click** on **Security Info** > **click** on **Add Method**

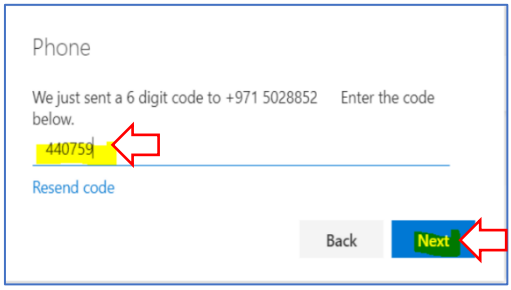

4. **Select Phone** > **click Add**

5. **Enter** your **Phone Number,** check **Text me a code** and **click Next**

6. **Enter the code sent** to your mobile via SMS and **click Next**

7. **Click Done**
